Summary:

B.Tech Computer Engineering graduate with hands-on experience in **Full-Stack Software Development** using the **MERN Stack**. Currently working as an **AI Full Stack Developer Intern at Kgamify**, building scalable web applications, REST APIs, and AI-powered solutions. Skilled in **React.js, Node.js, Express.js, MongoDB, FastAPI, Docker, AWS, Git/GitHub, CI/CD, and JavaScript**. Passionate about solving real-world problems through clean, efficient, and scalable software solutions

Work Experience

Ai full stack developer intern | Kgamify

(Feb 2026 - Present)

- Developed and maintained a **Brand Management and Advertisement Platform** using the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**.
- Built and integrated **RESTful APIs** using **Node.js** and **Express.js** for brand, advertisement, and user management.
- Designed and implemented responsive, user-friendly interfaces using **React.js** and **Tailwind CSS**.
- Managed and optimized data storage, retrieval, and database operations using **MongoDB** and **Mongoose**.
- Implemented key features including **brand registration, advertisement creation, sponsorship booking, analytics integration, and dynamic advertisement display**.
- Integrated external APIs to fetch and display real-time championship and advertisement data.
- Used **Git** and **GitHub** for version control, team collaboration, and source code management.
- Containerized the application using **Docker** and **Docker Compose** to ensure consistent development and deployment environments.

Academic Projects:

1. Medicare System

(May 2025 - Sept 2025)

- Developed an AI-powered Medicare platform for secure doctor-patient interactions using the MERN Stack.
- Integrated an LLM-based symptom checker to analyze symptoms and recommend appropriate specialists.
- Built an AI appointment assistant for automated doctor recommendations and appointment scheduling.
- Implemented real-time chat, role-based authentication, and secure REST APIs using Socket.IO and JWT.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, AI (LLM)

2. Smart Task Planner

(Nov 2025 - Jan 2026)

- MERN Stack application that converts user goals into AI-generated task plans.
- Implemented JWT authentication and REST APIs for task and progress management.
- Built AI-powered weekly performance reports with task dependency and timeline tracking.
- Optimized application performance using MongoDB indexing and a responsive React.js interface.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Groq/OpenAI API

3. AI Crop Selling Advisor

(Nov 2024- March 2025)

- Developed a MERN-based platform for crop listing, auction bidding, and inventory management.
- Built secure REST APIs with JWT authentication and role-based access control.
- Implemented a real-time bidding system using Socket.IO for live auction updates.
- Optimized MongoDB performance and integrated Cloudinary for secure image management.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Cloudinary

Skills:

Languages: C++, Python, JavaScript, SQL, MongoDB.

Developer Tools: VS Code, Git, GitHub, Google Colab, MongoDB, Cursor, Excel, Power BI.

Technical Skills: Frontend, Backend, React.js, Node.js, Express.js, Vercel, CI/CD, AWS.

Core Concepts: Data Structures & Algorithms, OOP, Authentication (JWT), API Integration

Education:

B.Tech : Vishwakarma Institute of Information Technology, Pune | CGPA - 7.54

(2022 - 2026)

Junior College, Chandwad | Nashik, Maharashtra.

(2022)

HSE Board | - 63.33%

SSC Board | - 82.20

(2020)

Certifications & Achievement

- AWS(Virtual Internship)
- IBM Full Stack Software Developer Professional Certificate (Coursera)
- Resume Matching Job Description Skill-Enhanced Sentence Embeddings Hybrid Algorithm Multi-Aspect Matching (Research Paper Published IJCRT)
